

QA Technology is pleased to launch our new Competitor Part Number Cross Reference Tool. This smart on-line tool makes it easy to look up QA's equivalent product using other probe manufacturers' part numbers without the need for added characters (dash/space/period).

When there's a match, the direct link to our product series will offer full specifications to ensure the proper drop-in replacement or simply add a quantity to the shopping cart to order.

- BT Technology
- Everett Charles Technology (ECT)
- Feinmetall
- Interconnect Devices Inc (Smith Industries)
- Ingun Prufmittelbau
- Leeno Industrial
- Lone Star
- Ostby Barton (Division of ECT)
- PTR Messtechnik

Competitor part numbers are crossed to the best form, fit and function of the product and may have variations in specifications. For QA product details and ordering information, please refer to www.qatech.com or email at sales@qatech.com.

Check it out [HERE](#) and see how QA can be the source for all your test probe needs.
