

Sharp “N6” Star Tip Style Now in Steel

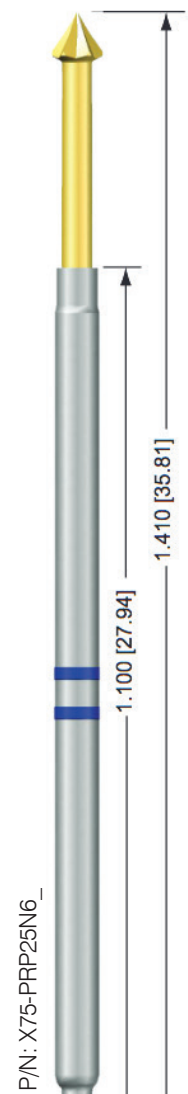

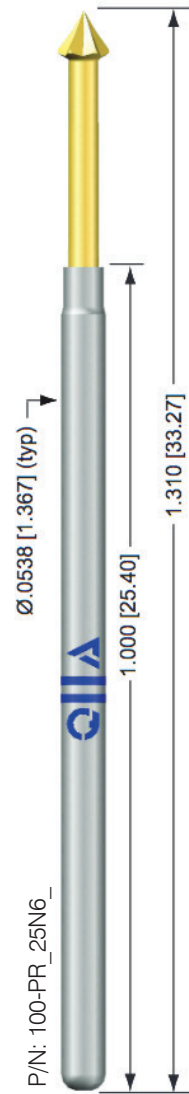

Our N6 ‘self-cleaning’ Star tip style is now offered in steel. Designed with 6 sharp edges to aggressively penetrate through heavy flux and contamination on thru-holes or vias, the steel tip’s hardness rating ensures it will remain sharp for longer.

As with the beryllium copper version, the N6 tip is available for our 100-25 and X75-25 series.

100-25 & X75-25 SERIES
