

55 Crown Tip Style For Long Stroke Probes

Our “55” self-cleaning, steel crown tip style is now available in our .400 [10.16] long stroke 100-mil and X75 Socketless probe series to capture smaller leads and posts in dual level testing.

This crown has 5 high and 5 low ridges to trap and prevent the lead or post from glancing off the head. The short inner ridges make them stronger and less susceptible to damage; while its self-cleaning design reduces contaminant buildup, making them easier to clean.

100-40 & X75-40 SERIES

.400 [10.16] Full Stroke, .317 [8.05] Working Stroke
