

EXPANDING Plating/Color Options in Small Sized Sockets

QA is now offering different plating options in our smaller sized 0.039" and 0.050" center sockets. These options allow for a visual identifier for faster probe replacement when required by the end user.

For example, if every 0.250" probe is to be replaced in a silver colored socket and if every 0.400" stroke probe is to be replaced in a gold colored socket.
