

SAVE WITH OUR New Low Cost High Conductivity Silver Plated Tube

With today's rising cost of gold, QA is pleased to offer a lower cost probe tube alternative to both our 0.075" center probe series (075-25 and 075-40). Our new highly conductive silver plated (V) probe tube provides low-resistance and reliable performance without sacrificing longevity. To help reduce your overall cost of test, this new alternative is great to use in combination with the same silver plated tube in our 0.100" center, 0.250" and 0.400" stroke product series.

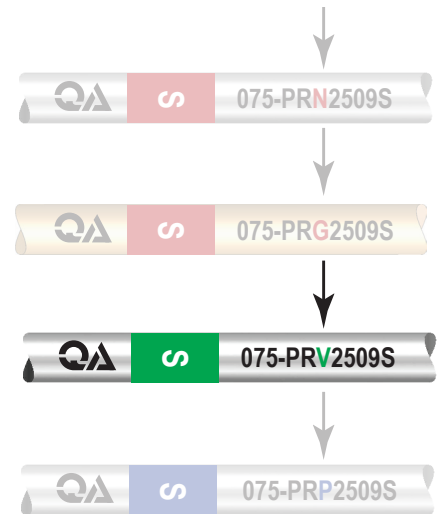

Their color-coded green marking allows rapid identification when it comes time to maintain or replace these probes.

PROBE TUBE SPECIFICATIONS

PRODUCT	MATERIAL/FINISH	AVERAGE RESISTANCE	CURRENT CARRYING AMPS (MW (SS) SPRING
075-PRV25	Nickel silver/ Silver plated	< 20 mOhms	8.1 (11.0)
075-PRV40	Nickel silver/ Silver plated	< 20 mOhms	7.7 (10.5)

If you need economical or specialized high current test probe solutions, QA offers many choices. Now with four probe tube choices, 45+ tip styles, and seven spring forces in our 075-25 probe series, we provide the best probe for your application.
