## Bottom Side Extraction Tool for Damaged Sockets

In applications where pushing a damaged socket through the plate is not feasible, these tools enable socket removal by driving the socket out from the bottom side of the plate (termination end), minimizing damage to the plate and surrounding components.

Available in the following sizes, with optional replacement tips when the tips become worn or damaged.

**QA Technology is globally recognized for:**

- Exceptional Product Performance
- Competitive Prices
- Fast Delivery
- Outstanding Service

Replacement Tip (2 pcs)
