

QA is pleased to offer a new tool organizer. The sturdy canvas tool roll is compact and can easily be hung on your bench or wall. The clear vinyl pockets allows visual and easy accessibility to accommodate a variety of probe and socket maintenance tools. *(tools are sold separately).*

In addition to our accessories, we are adding a hammer and brush. The 4oz ball-peen hammer is just the right size and weight to properly install or extract our sockets or termination pins.

*Tools are sold separately*

Our natural bristle brush easily cleans test probe tips as part of your regularly scheduled probe maintenance program. The bristles are stiff enough to clean away fluxes and debris without damaging the tip. Simply brush and vacuum.
